Drzwi wejściowe
Entry Doors

Haustüren nehmen einen besonderen Stellenwert unter den Bauelementen ein, weil eine Haustür nicht nur in den Abmessungen und Farben, sondern in der gesamten Gestaltung individuell und damit für jedes Projekt unterschiedlich entworfen werden kann.

Wenn sich ein Bauherr für eine Haustür aus Holz entschlossen hat, dann kann er etwas Besonderes und Einmaliges für sein Haus erwarten.

Mit dieser Broschüre möchten wir Ihnen Vorschläge unterbreiten, auf deren Grundlage Sie zusammen mit Ihrem Kunden einen Entwurf für eine individuelle Haustür entwickeln können.

Die dargestellten Haustüren werden von uns in der hier gezeigten Form laufend produziert, wobei es in den meisten Fällen Abwandlungen nach Kundenwunsch gibt. Unter Bezugnahme auf die Referenznummer des von Ihnen gewählten Türentyps können Sie uns die gewünschten Änderungen mitteilen und wir werden dann in einen neuen Türenentwurf die gewünschten Änderungen einarbeiten.

Sollte keine der dargestellten Haustüren Ihren Vorstellungen entsprechen, dann können Sie uns einen völlig freien Entwurf zusenden.

Auf der letzten Seite finden Sie einen kurzen, beispielhaften Überblick technischer Gestaltungsvarianten.

Der Umfang an verfügbarer Beschlagstechnik für Haustüren, von Türgriffen über Türbändern bis zu Bodenschwellen ist derart umfangreich, dass wir Ihnen hierzu gerne auf Nachfrage ein für Ihr Projekt passendes Informationspaket zusammenstellen.

Les portes d'entrée tiennent une place particulièrement importante parmi les éléments de construction. Ce ne sont pas seulement ses dimensions et ses couleurs qui importent dans sa réalisation puisqu'une porte d'entrée peut être conçue de manière personnalisée et différente d'un projet à l'autre.

Lorsqu'un maître d'ouvrage s'est décidé pour une porte d'entrée en bois, il est en mesure d'attendre quelque chose de particulier et d'unique pour sa maison.

Avec cette brochure, nous souhaitons vous soumettre des suggestions sur la base des quelles vous pourrez développer avec votre client une ébauche pour une porte d'entrée individuelle.

Les portes d'entrée représentées sont fabriquées par nos soins dans les formes décrites; dans la plupart des cas, des modifications peuvent être effectuées selon les souhaits du client. En s'appuyant sur le numéro de référence de la porte que vous avez choisi, vous pouvez nous faire part des changements souhaités que nous incluons dans une nouvelle ébauche de porte.

Si aucune des portes représentées ne correspond à vos attentes, n'hésitez pas à nous faire parvenir votre projet tel que vous le concevez.

Sur les dernières pages, vous trouverez un bref aperçu technique des variantes de conception. La palette de systèmes de ferrures disponibles, des poignées aux paumelles en passant par les seuils, est si variée que nous restons à votre disposition pour toute information correspondant à votre projet.

Drzwi wejściowe zajmują szczególną pozycję pomiędzy elementami budowlanymi, ponieważ mogą być kształtowane indywidualnie nie tylko pod względem wymiarów i kolorów, ale również ogólnego wyglądu i dzięki temu dla każdego budynku mogą zostać inaczej zaprojektowane.

Jeżeli inwestor zdecyduje się na drzwi drewniane, może oczekiwać czegoś szczególnego i wyjątkowego dla swojego domu.

W tej ulotce przedstawiamy propozycje, na bazie których architekt wspólnie z klientem może zaprojektować indywidualne rozwiązanie drzwi wejściowych.

Przedstawione drzwi wejściowe produkowane są na bieżąco w zaprezentowanej formie, przy czym w większości przypadków na życzenie klienta uwzględniane są zmiany. Powołując się na numer (symbol) wybranego typu drzwi wejściowych możecie Państwo poinformować nas o proponowanych zmianach a my opracujemy nowy projekt, który je uwzględni.

W przypadku gdy żadna z propozycji nie odpowiada Państwa wyobrażeniom, istnieje możliwość przedstawienia własnego projektu.

Na dwóch ostatnich stronach znajdziecie Państwo krótki, przykładowy zarys technicznych wariantów konstrukcyjnych.

Zakres dostępnych technik okuwania do drzwi wejściowych, począwszy od klamek, przez zawiasy, a skończywszy na progach jest tak obszerny, że na życzenie chętnie dobierzemy odpowiedni pakiet informacyjny, pasujący do Państwa projektu.

Entryways hold a special importance as building elements because they can vary from project to project, not only in size and color, but rather as a total design style and concept.

When a designer resolves to incorporate entry doors of wood, something special and unique can be expected.

In this brochure we hope to provide you with a range of suggestions forming the foundation from which you and your client can develop an individual design statement for realization.

The specific entryway and entry door designs illustrated in the following pages are forms that are regularly produced by us. Each design presented here can also be modified and design elements can be combined to create a unique variation within the theme.

In the event a desired style or configuration is not found here, we also work directly from custom drawings by the architect, from conceptual sketches or from photos of existing or historic doors to create the perfect design solution for your project.

In the last pages you will also find cross sections illustrating some of the technical variations possible.

Additionally, we offer an extensive selection of door hardware and fittings, and we will be happy to prepare a packet of information and selections custom tailored to meet your specific project budget and architectural style.
